Harshavardhan Rajendra Patil

Kolhapur, Maharashtra, India | +91 7887996573 | harshpatil8114@gmail.com | github.com/HarshPatil0804

Summary

Data Analyst with hands-on experience in SQL, Python, Power BI, Excel, and PostgreSQL, turning raw business data into clear, decision-ready insights. Skilled in data cleaning, KPI development, dashboard design, and exploratory analysis across HR and financial datasets, with a focus on translating business questions into structured analysis for stakeholders.

Experience

Data Analytics with AI Intern (Virtual) Aug 2026 – Sep 2026
IBM SkillsBuild | AICTE | BharatCares *6 Weeks*

- Completed the 6-week IBM SkillsBuild Data Analytics with AI Internship (ID: IBMUEDA0218) with AICTE and BharatCares; earned a Certificate of Training.
- Trained in data cleaning, EDA, predictive modeling, and ML basics (regression, classification, decision trees, clustering) via expert-led masterclasses.
- Built Power BI visualizations and AI-driven insights; presented a final project aligned with the UN SDGs.

Data Analytics Intern Aug 2026 – Sep 2026
Codtech IT Solutions Private Limited *Hyderabad, Telangana (8 Weeks)*

- Completed an 8-week Data Analytics internship (ID: CITS8197); certificate cites strong dedication, technical skills, and a positive learning attitude.
- Cleaned and analyzed datasets using Python, Pandas, and SQL; built Power BI dashboards presenting KPIs and trends.
- Collaborated with the team, shared regular progress updates, and applied supervisor feedback.

Education

B.Tech in Data Science, Kolhapur Institute of Technology, Kolhapur 2023 – 2027
HSC, Kedarling High School and Jr. College, Gadhinglaj 2022 – 2023
SSC, Shri Ram Vidyalay, Kowad 2020 – 2021

Technical Skills

Programming & Querying: Python, SQL
Data Analytics & BI: Power BI, Microsoft Excel (Pivot Tables, VLOOKUP, Formulas), Data Cleaning, EDA, Data Visualization, Dashboard Development, KPI Analysis, Business & Stakeholder Reporting
Libraries & Databases: Pandas, NumPy, SQLAlchemy | PostgreSQL, SQL Server
Additional & Tools: DuckDB, Pyodide, LLM Integration, YOLOv8, OpenCV | Git, GitHub, Streamlit, VS Code, Jupyter Notebook

Projects

HR Employee Attrition Analysis Dashboard GitHub

- Analyzed attrition data to uncover turnover drivers, showing HR where risk was concentrated by department and demographic.
- Cleaned data with Python and Pandas, loading it into PostgreSQL via SQLAlchemy for reliable, repeatable analysis.
- Wrote SQL queries to build attrition KPIs by department and segment, surfacing top turnover factors.
- Delivered an interactive Power BI dashboard for self-serve attrition trends and department metrics.

Bank Loan Analysis Dashboard GitHub

- Analyzed 38K+ loan records using Python, Pandas, PostgreSQL, and SQL to assess lending performance and risk.
- Performed EDA on loan trends, borrower patterns, and repayment behavior to clarify portfolio risk.
- Built SQL-based KPIs for applications, funded amounts, repayments, interest rates, and good vs. bad loans.
- Designed an interactive Power BI dashboard showing lending trends, borrower profiles, and loan status at a glance.

AI Data Analyst Agent GitHub | Live Demo

- Built a browser-native agent that turns plain-English questions on CSV/Excel/JSON data into SQL and Python, executed client-side via DuckDB-WASM and Pyodide (no raw data leaves the browser).
- Added schema/safety validation and a 3-retry self-correction loop so only verified results show; built an insights engine narrating real computed statistics.
- Added auto charts/KPI cards and 5-provider LLM failover (Groq, Gemini, Mistral, Cerebras, Cohere); 200+ tests, deployed on Vercel.

Certifications

Google Cloud Data Analytics (Google Cloud) | Microsoft Certified: Data Analyst Associate (Udemy) | Data Science & Analytics (HP LIFE) | Fundamentals of Analytics on AWS, Part 1 (AWS) | Introduction to MS Excel (Simplilearn)
